Introduction

Chapter 1

“Where are all these students coming from and why are they here?”

The rush to be educated in western countries	7
Why do we let them into our colleges and universities?	8
English language education - a competitive edge	11
Too many people with degrees - the rush for graduate educations world-wide.	12
The hunger for economic growth	13
Phase 1: Foreign educations.	13
Phase 2: Develop institutions at home with foreign teachers.	14
Phase 3: Local institutions with local teachers.	14
What international students want from a western institution	15
Some strategic reasons	16
Some tactical reasons	17
International students don't want to be in Kansas (or Karachi, or Shanghai or, ...) anymore	19
“Us” and “them”	19
Chapter 1	7

Chapter 2

Teaching, learning, and Research - "What are we all about?"

Some differences between post-secondary institutions in western countries: ..	23
Some similarities between post-secondary institutions in western countries: ..	24
What western University and College faculty think higher education is all about.	24
The results of faculty having varying viewpoints:	26
Lectures versus learning - who is the center of attention?	27
“Research as a means to an end” or “research for it's own sake”?	28
Summary of Bad and Good structures and processes:	28

What international students think about research	29
How to get international students to understand and buy into your process .	30
How to help international students understand what higher education is all about	31
1. Help them learn what learning is about.	31
2. Orient them at the outset to how institutions work.	32
3. Create powerful communities of alumni	32
4. Mentors!	32
The value of “foundations” programs	32
1. Length of the program.	32
2. Content of the programs	33
3. Location of the programs	33
Conclusion	34

Chapter 3

Success Orientations

The Success Orientations model	37
The three success orientations	39
Some important notes about this model	41
This is just a behavioral model	41
Success orientations are not mutually exclusive	41
No orientation is “good” or “bad”	41
The model’s foundation: basic human needs	42
Orientations are partly genetic and partly learned	42
No-one is stuck with an orientation for life	43
The relationship oriented person	44
Some general factors that describe a relationship oriented person	44
Things you will hear a highly relationship oriented person say	46
Spaces a relationship oriented person enjoys being in	47
Some cultures that demonstrate strongly relationship oriented tendencies .	48
Careers that attract relationship oriented people	50

Summary - implications for teachers of international students51
The process oriented person54
Some general factors that describe process oriented people54
Things you will hear a highly process oriented person say57
Spaces a process oriented person will like to be in58
Some cultures that demonstrate strongly process oriented tendencies60
Careers that attract process oriented people60
Summary - implications for teachers of international students61
The goal oriented person66
Some general factors that describe goal oriented people66
Things you will hear a highly goal oriented person say68
Spaces a goal oriented person will like to be in70
Some cultures that demonstrate strongly goal oriented tendencies72
Careers that attract goal oriented people72
Summary - implications for teachers of international students73
Teaching a mixed orientation class79

Chapter 4

Learning styles and other oddities

Differences result in barriers to meaningful interactions86
A three-step process of breaking down barriers to communication:86
What international students' K-12 education looks like90
Foundation knowledge and skills90
Implications92
Why individual work and independent thinking is so important93
Some common symptoms:93
The perceived value of individualism and independence:94
The value of collectivism:95
Individualism and collectivism - context and balance96
Sounds good, but how...?96
How to bridge the differences between different systems97

Conclusion	98
------------------	----

Chapter 5

Assessing international students

What we mean by assessment in western Universities and Colleges.	102
Some reasons why typical assessments in western post-secondary institutions don't provide an accurate view of student abilities:	103
1. Lack of reasonable access to teachers	103
2. Process oriented assessments dominate	103
3. Good assessments are irritatingly difficult do to	104
4. The term "assessment" means different things to different people	105
What do good assessments (anywhere) look like?	105
The benefits of good assessments	107
The costs of good assessments	108
What "assessment" means in different cultural contexts	109
Process oriented K-12 educations result in a grades focus	109
A grades focus continues at post-secondary levels	109
Trust is a big factor in assessments	110
How to assess a class of mixed orientations, learning styles and cultures ...	111
1. Communicate excellently	111
2. Provide a variety of assessment opportunities and modes	115
Summary: Assessments - not multiple-choice exams	116

Chapter 6

Common Challenges

Specific Challenges dealt with in this chapter	120
1. "Why don't the team projects I assign work out the way I intended?". ...	120
Some specific techniques that can help	123
2. "How do I get international students to talk to me?!?!?"	125
I.Learn how high-power distance structures work	126
II. Build into your personal teaching style an understanding of the feelings that are intrinsic to high power distance structures.	128

3. "How do I get students to participate in classroom discussions?"	130
Good contributions, not pandering to the teacher	130
Accents can frustrate smooth discussions	131
Techniques for getting students to contribute to discussions	132
I. Sex, politics and religion	132
II. "Tell us about your country"	136
III. Enthusiasm	137
IV. Validation, celebration and encouragement - a virtuous trio	138
4. "Must they negotiate everything?!?"	140
Some techniques for finding a balance between being open to student input and retaining some order and certainty in your planned processes	141
5. "What they think the word 'fair' means is different from what I think the word 'fair' means!"	143
Some techniques for maximizing student feelings of fairness	144
6. "Why won't they make an appointment?..."	146
A couple of different perspectives on this challenge	146
Balancing accessibility to students and meeting your other commitments	147
7. "Are English abilities important?"	148
The "No" part	150
8. "Why won't my students read?"	151
Important: Do not confuse "diligent reading with "good students"	153
Techniques for overcoming reading barriers	154
9. "Why do they write their essays the same way they chat on-line?"	156
10. "Should I say that in class?"	162
11. "Why do they keep using: 'My grandmother [uncle, aunt, ...] died' "	163
Some insights into the "my grandmother died" situation	164
A Technique for dealing with dying grandmother issues	165
12. "Should I socialize with my students?"	166
13. "Why are some students continually late for class?"	168
Causes	168
Possible solutions	169

Summary - More Challenges	171
---------------------------------	-----

Chapter 7

Putting it all together: Setting up powerful learning experiences and environments for international students

Principle #1: Understand your students	175
Some ways to learn about your students	175
Principle #2: Build trust	177
How to build trust with your students	178
I. Listen to your students.	179
II. Take time to explore the nature of their experiences.	179
III. Be consistent in your behavior, processes, rules, and conduct.	180
IV. Be honest.	180
V. Communicate prodigiously.	181
Principle #3: Break down barriers to learning	183
Setting up classroom experiences to break down barriers	184
I. Layout of the classroom	184
II. Schedules	186
III. A 'safe' learning environment	186
IV. Break down power distance between you and your students	189
V. Hammer away at "learning" versus "grades" with your students	189
VI. Use students to help students	190
Principle #4: Communicate effectively	191
I. The comprehension gap	191
II. Communicate with students in multiple modes.	192
III. Transmit information in different modes - at the same time!	193
Principle #5: Focus on the root of things	194
Explore the learning process with them.	194
A common query about time spent on learning about learning	196
Some great topics on learning to learn that you can use with your students	197
Principle #6 - Challenge students in different ways	198

Vary learning experiences to help all students learn.198

Chapter 8

What's in it for you: The rewards from teaching international students

A career "edge"207

Relationships with students that bridge many rivers208

Daily insights that - another big reward208

A full, rich, and rewarding life - the biggest reward208

Appendix

What is your success orientation?

A practical self-assessment learning experience.I

Interpreting your responsesVII
